Speaking (intermediate)

### PAST EXPERIENCES BEFORE 2000 :

In 1995-97 and 98-2000, I have worked at ABT Software Company as programmer for 3 years. (I used Borland Delphi and paradox database to develop a PVC software. I developed drawing and computing modules. Additionally, I made software layout designs and graphic designs.

I developed a multimedia CD project used for teaching computer usage (1998-99). For this project, I used Macromedia Director, Adobe Flash, 3ds Max, Rhinoceros, Photoshop, CorelDraw. That project includes mostly 3d scenes. I used 3dsMAX to make a village and interior scenes. Also I modeled a Rabbit character with Rhino and set in motion with 3dsMAX, and Flash used to interactive training movies. And all of 3d, 2d materials combined with Director. (Screenshots: [1](#), [2](#), [3](#)). I was positioned as CD, GD, 3M, AD, GM.

For children aged 6-9, we made a general education program using mostly Macromedia Director, Adobe Photoshop. This interactive application includes 3d scenes too and I used 3dsMAX to create these scenes.

In 1997, I have worked in Bena Advertising agency as Graphic Designer. I used CorelDraw, Photoshop to desktop publishing. I made institutional identity works and made catalogues, brochures, magazine advertisements.

I have worked as a freelance Graphic Designer &Flash Developer for 2 years. I focused on web design, interactive CD, demo animations. Additionally I've involved in 3d for short films combined 3d animation and video. In addition, I have taken OpenGL lessons in Yildiz Technical University for six months.
